Second Nature By Hand

Second Nature
by Hand

Second Nature by Hand creates quality, one-of-a-kind products. Their products contain a story, a soul, a moment of history. Their handmade treasures with soul enhance the sales in your store, and the walls of your home.

Selected pieces are made with reclaimed materials such as timber from 100 year old buildings. Second Nature by Hand proudly creates artwork from such special, unique and finite materials.

No two products will ever be exactly the same. Each piece will be unique and show natural wear from the history of time. Character and slight imperfections are inherent and to be expected from natural or reclaimed materials. Variance in color, knots, scuffs, nail holes and natural cracks are a big part of what keeps customers coming back for more amazing pieces year after year.

As a foodie family, Thanksgiving is a big deal in our household and our favorite holiday. Each year, we cook a feast and set a beautiful table for lots of family & friends. In 2015, we were tired of doing the dishes for days on end after the big event, so we vowed to go disposable the following year. We could not find anything elegant that we'd be proud to set our table with, and so we designed it ourselves!

Our line of wavy-shaped paper plates was an instant hit and became an Oprah Favorite! Since then, it has become our mission to create products that inspire people from all walks of life to gather around a beautiful table and break bread together.

Wishing Thread

ETERNITY CRYSTAL
Wishing Thread

Fabulous product with great packaging, a touching story and proven track record!

Eternity Crystals are believed to be formed from the frozen breath of Aeternitas. Pieces that plummeted to the earth, were embedded into mountains, later to be discovered near the end of the Roman Empire. When they were found, it was thought to be an omen of good fortune.

Given to skilled artisans, who carved them into shapes, they were cut with many facets to reflect and amplify the energy around them. It was said they would carry your wishes through the night sky; bringing much health, happiness and prosperity to its owner.

Over the years the legend of the Eternity Crystals has travelled near and far. Some had started to add smaller crystals, to help lighten the burden of each Eternity Crystal. Each small crystal represents a facet in one's life. With each crystal your wishes are heard, and carried into the sky. Make your wishes with this Wishing Thread into the moonlight.
